Address: Jugsalai, Jamshedpur
Contact: +91-620-234-3382

CAREER OBJECTIVE

Dedicated BCA student with demonstrated expertise in full-stack web development, data science, and software engineering. Skilled in Python, Java, JavaScript, and Django with hands-on experience building production-ready applications. Seeking an IT Developer / Software Developer / Full Stack Developer position to leverage technical skills and contribute to innovative projects while expanding professional capabilities.

CORE TECHNICAL SKILLS

Programming Languages:	Python, Java, C, C++
Frontend Technologies:	HTML5, CSS3, JavaScript (ES6+), React.js, Redux_Toolkit
Backend Frameworks:	Django, MySQL
Databases:	MySQL, MongoDB, SQL
Version Control & Tools:	Git, GitHub
Data Science Tools:	Python (Pandas, NumPy, Matplotlib, Seaborn, ML Models), Power BI
Specializations:	Full-Stack Web Development, Data Science, Data Analytics, AI&ML

EDUCATION

- **Srinath University** *(2023-2026)*
  Bachelor of Computer Application: GPA: 8
- **Jamshedpur Women's College** *(2023)*
  Intermediate with Science: Marks: 74.6%
- **Sri Ram English High School** *(2021)*
  Matriculation: Marks: 86.4%

PROFESSIONAL EXPERIENCE

Full Stack Web Developer Inter *(June,2025-Sept,2025)*
Paul Tech Software Services Pt. Ltd.

- Developed and deployed responsive web applications using HTML5, CSS3, and JavaScript for frontend interface
- Implemented backend functionality using Django framework with MySQL database integration

Data Science Inter *(Oct,2024-Dec,2024)*
YHILLS (online)

- Analyzed large datasets using Python (Pandas, NumPy) for data cleaning and preprocessing
- Developed data visualization dashboards using Matplotlib and Seaborn
- Built customer churn prediction model achieving [X]% accuracy using machine learning algorithms
- Performed exploratory data analysis (EDA) to identify customer behavior patterns

Data Science Intern *(March2026-May2026)*
VIZZTAL ACADEMY

- Completed hands-on training in Data Analytics using Python and Power BI, focusing on data cleaning, exploratory data analysis (EDA), and business reporting.
- Utilized Pandas, NumPy, and Matplotlib to analyze, process, and visualize data effectively.
- Applied ETL (Extract, Transform, Load) techniques to prepare and transform raw data for meaningful insights and reporting.
- Created interactive Power BI dashboards and KPI reports to support data-driven decision-making.
- Executed end-to-end analytics projects involving data collection, preprocessing, visualization, and insight generation using structured problem-solving methodologies.

PROJECT

LEARNIFY - Online Learning Platform
Technologies: Django, MySQL, HTML5, CSS3, JavaScript

- Engineered full-stack e-learning platform with user authentication and course management system
- Implemented secure user registration/login module with password encryption
- Developed course enrollment system with progress tracking functionality
- Integrated exam system with automated certificate generation

NETFLIX CLONE - Streaming Application
Technologies: HTML5, CSS3, JavaScript

- Built fully functional Netflix clone streaming application with interactive UI
- Implemented user authentication and personalized movie recommendations
- Designed trending movies display with search and filter functionality
- Created responsive design optimized for desktop, tablet, and mobile devices
- Deployed application on GitHub Pages with continuous integration

CAMPUSAI – Placement Prediction
Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Streamlit

- Developed a placement prediction system using machine learning algorithms and student performance data
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) to improve data quality
- Built predictive models to analyze placement probability and identify key placement factors
- Created interactive dashboards and visualizations for placement trends and performance insights
- Applied data-driven problem-solving techniques to generate actionable recommendations

ADMIN/EMPLOYEE-DASHBOARD – Employee Management System
Technologies: React.js, JavaScript, Tailwind CSS, Context API, Local Storage

- Developed a role-based employee management system with separate Admin and Employee dashboards
- Implemented user authentication and authorization for secure access control
- Built responsive and interactive user interfaces using React.js and Tailwind CSS
- Managed application state efficiently using React Hooks and Context API
- Enabled task assignment, tracking, and performance monitoring functionalities
- Applied component-based development and structured problem-solving to enhance application scalability and user experience

CERTIFICATIONS

- Full Stack Web Development Internship Completion Certificate – Paul Tech Software Services
- Data Science Internship Completion Certificate – YHILLS
- 3-Day Data Science & AI Workshop Certificate – FECHUR School
- Data Science Internship Completion Certificate – VIZZTAL ACADEMY

PROFESSIONAL SKILLS

- **Soft Skills:** Active Listening, Public Speaking, Time Management, Problem-Solving, Team Collaboration, Technical Documentation, Client Communication.
- **Development Practices:** Agile Methodology, Code Version Control, API Documentation, Database Design, UI/UX Design Principles.
